profile

I am a skilled Frontend Engineer with expertise in **React**, **Redux**, **TypeScript** and **Next.js**. I build modern, high-performance web applications that handle extensive data and traffic efficiently. Committed to agile methodologies and industry standards, I prioritize modularity, reusability, and consistent performance. My collaborative approach and dedication to quality ensure visually appealing and scalable web solutions.

Experience

Frontend Developer/Project 2024
Link to the project

Dynamic and Intuitive UI with Enhanced User Experience
- Leveraged **React** and **TailwindCSS** to create a visually appealing, responsive user interface.
- Implemented **Framer Motion** for smooth animations, significantly improving user engagement and satisfaction, leading to increased customer retention.

Efficient Data Management with Reliable Real-Time Updates
- Utilized **React Query** for fast, reliable data fetching and synchronization.
- Ensured seamless real-time updates, enhancing the browsing experience and contributing to higher sales and revenue.

Streamlined Product Ordering Process
- Developed a seamless ordering system with secure payment integrations and industry-standard compliance.
- This reduced cart abandonment rates, increased conversion rates, and contributed to a significant boost in sales.

Robust Order Tracking System
- Implemented a system where users can monitor their purchases using unique order IDs with real-time updates.
- This feature improved customer satisfaction and loyalty by providing transparency and reliability in the order process.

Performance Optimization for Scalability and Reliability
- Conducted extensive performance optimizations, including code splitting, lazy loading, and browser caching.
- Ensured the platform handles high traffic volumes smoothly, providing a scalable and maintainable solution that supports future growth.

Frontend Developer/Project 2023
Link to the project

Seamless Music Streaming Integration
- Implemented React Player for seamless music streaming, allowing users to enjoy the artist's music without interruptions. This feature enhances user engagement and showcases the artist's work effectively.

Elegant and Interactive UI with Custom Modals
- Used Styled Components and Compound Components to design a visually appealing and interactive user interface. Created custom modals that provide a smooth and engaging user experience, making the site both functional and aesthetically pleasing.

My skills

- HTML AND CSS
- Tailwindcss
- React
- Typescript
- Next.js Git
- and Github
- Vue.js
- Bootsrap

Education

Bachelor of Agric.

B.A in Agricultural Administration.
Federal University of Agriculture Abeokuta, Nigeria.
