profile

I am a skilled Fullstack Engineer specializing in frontend development, with expertise in **React**, **Redux**, **TypeScript**, **Next.js**, **Node.js**, **Express**, **Vitest**, and **Docker**. I build modern, high-performance web applications that handle extensive data and traffic efficiently. Committed to agile methodologies and industry standards, I prioritize modularity, reusability, and consistent performance. My collaborative approach and dedication to quality ensure visually appealing and scalable web solutions.

Experience

Jumia 2022 - 2023

Link to their official website

Junior Frontend developer (full time)

- Part of an agile team that creates scalable solutions leveraging state-of-the-art technologies in a service-oriented architecture
- I work closely with multidisciplinary teams (Backend developers, DevOps, QA engineers, Product Owners) oriented to continuous delivery
- Working across the entire product life cycle: concept, design, development, deployment, testing, release, support
- Constructing and verifying (unit test) software components to meet design specifications.

Frontend Developer/Project 2024

Link to the project

- Lead developer for an e-commerce project utilizing **React**, **React Query**, **TailwindCSS**, **Framer Motion**, and other libraries.
- Created a dynamic and user-friendly platform with seamless navigation and streamlined product ordering processes.
- Significantly enhanced user experience, resulting in increased sales and revenue for the client.

Tech champions 2021-2022

Intern-Frontend developer (fullt ime)

- Internship focused on frontend development using **HTML**, **CSS**, and **JavaScript**.
- Engaged in practical exercises in building user interfaces for real-world solutions.

My skills

- HTML AND CSS
- Tailwindcss
- React
- Typescript
- Next.js
- Git and Github
- Vue.js
- Node.js

Education

Bachelor of Agric.

B.A in Agricultural Administration.
Federal University of Agriculture Abeokuta, Nigeria.
